

Do you understand the latest government regulations for transporting hazardous material and managing hazardous waste?

Daniels Training Services can help

## The Hazardous Waste Determination Under the Generator Improvements Rule

The [Generator Improvements Rule](#) went into effect on May 30, 2017 in the federal regulations of the U.S. Environmental Protection Agency (USEPA) and in those [states that lack an authorized hazardous waste program](#).

Since that date, states with an authorized hazardous waste program have the option of adopting all of the 60+ changes to the generator regulations or only those that are more stringent than existing regulations.

**IMPORTANT NOTE:** ALL of the revisions made by the Generator Improvements Rule to the regulations of the hazardous waste determination are MORE stringent than existing regulations, *thus every state must either adopt these revisions or create its own that are even more stringent.*

**[Refer to my detailed blog article on this important subject for complete information on:](#)**

- [How to determine your hazardous waste generator status](#)
- Why the word "accurate" matters in the hazardous waste determination
- Key steps in hazardous waste determination
- Regulatory exclusions (yes, there are some)
- Identifying listed and characteristic hazardous waste
- Identifying hazardous waste codes
- Maintaining records

**TIP:** If you are familiar with the previous Generator Improvements Rule, it may help you to see a [side-by-side comparison of before and after rule changes](#) to help you better understand and comply. [Contact me for further information.](#)

## Electronic Waste Banned from Landfill Disposal in New York - what you need to know

Consumers in the state of New York may not dispose of certain types of electronic equipment in landfills, waste-to-energy facilities, in the trash, or at curbside for trash pickup. Covered Electronic Equipment includes common items such as computers, televisions, VCRs, DVD players, electronic and video game players, and more.

**[For more information on the electronic equipment ban in New York State, refer to my blog article.](#)**

**TIP:** Under the [NYS Electronic Equipment Recycling and Reuse Act](#), manufacturers are required to provide consumers with a free and convenient opportunity to recycle their equipment. Visit the [NY State Department of Environmental Conservation website](#) for further information on waste collection sites, electronics covered by the act, and more.

## Frequently Asked Questions

What is a freight container?

Do I need a purge ticket for my cargo tank?

Is it OK to display "MISCELLANEOUS" on the Class 9 label?

What is a representative sample?

Does the De Minimis exception apply to Division 6.1 Packing Group I Poisonous Materials?

When does a spill or leak become "reportable"?

## Daniels Training Services A different kind of training

We provide training and consulting services to equip your team – whether it's just you or a group of employees – to safely ship, receive, transport or dispose of hazardous materials and waste.
